The Blizzard A385-S Pro Webcam

The A385-S Pro webcam is part of the Blizzard Pro line and has a 1 / 2.3 "CMOS distortion-free HD lens. It has a resolution of 4k (3840 * 2160) and uses a high-quality glass lens and a 4k image sensor. With high dynamic range (HDR) technology and autofocus, it delivers beautiful, lifelike video images. With the up to 5 X digital zoom you have a diagonal field of view from 65 to 90 degrees. It provides a crisp, clear picture and can be used as a live network for video calling and video conferencing. The built-in dual analog microphones feature intelligent noise cancellation and ensure that the sound quality is in line with the video quality. The color temperature is automatically set between 2800 and 7000K, so it always looks natural.

Features

- UHD 4K (3840x2160) video quality at 30 frames-per-second
- The color temperature is set automatically (2800-7000K)
- 5X zoom with 65, 78.5 or 90 degrees diagonal field of view
- Plug-and-play USB-C connectivity (Shipped with a separate cable USB-C to USB-A)
- Support H.264
- Perfect combination with bigger (4k) screens
- Dual analog microphones to make your voice more clear and natural
- Multiple mounting options

Blizzard A385-S Pro Webcam

Product-Specifications

Resolution	UHD 4K 3840*2160 30fps
Power consumption	400 mA @ 3840*2160 30 fps
Sensor size	1/2,3 Inch CMOS Sensor
Sensor model	imx378 Sony
MAX SNR	≥41dB
sensitivity	2400 mv/lux-sec
AEC/Gain/White balance	Automatic (2800-7000K)
Maximum refresh rate	UHD 30 fps
Lens Size	6.8mm
Focus length	4,74mm (distortion-less lens)
Diagonal field of view	65/78.5/90 Degrees
WDR-Technology	0-72dB
Number of microphones	2 x Analog (stereo)
Operating temperature (ambient)	-10°C to + 60° C
Dimensions	150mm*30mm*55mm
Interface	USB Type-C
USB Cable	USB Type-C - USB Type-A 1.5m

Feature spotlight

UHD 4K video quality at 30 frames per-second.

Brings UHD 4K video to video calls which enables expressions, non-verbal cues and movements to be seen crisp clear.

5X digital zoom.

Adjust the field of view from a wide 90° in which it includes more background to a narrow 65° or 78.5° to keep more focus on you.

USB Type-C

USB type C connection for higher bandwidth.

USB type C connection to support higher bandwidth for 4K video

Plug-and-play USB-C connectivity

Easily connects to PCs or Macs with no additional software required. Camera will be shipped with separate USB-C to USB-A cable.
